

ADAPTIVE SLOTTING

CREATING INDIVIDUALIZED SUCCESS

The Ascension Difference. At Ascension Logistics, we take slotting optimization to a whole new level by developing simplified slotting solutions for our clients.

We've created a proprietary solution that provides your warehouse with the necessary basic needs for re-slotting. This includes visibility to items movement, re-slotting recommendations, and integrated WMS directed work to re-slot the location. In addition the solution can be easily extended to add business specific slotting calculations.

As a result, your warehouse will be easier to manage and will yield increased revenues and greater productivity. All at an unbeatable value.

SLOTTING OPTIMIZATION FROM ASCENSION LOGISTICS

- Determine the best location for each of your products
- Leverage existing information from your archive data
- Visibility and knowledge about product movement
- Slot different area groups with their own slotting strategy
- Fast performing solution and flexible to your needs
- Integrated WMS Directed Work to re-slot locations

ORGANIZE. OPTIMIZE.

One of the most profitable steps a business can take is successfully slotting their warehouse. The location of your product in your warehouse is just as important to your bottom line as the product itself. Ascension Logistics includes Slotting Optimization as part of our portfolio of distribution management tools, helping our clients organize and optimize their warehouse goods, ultimately increasing productivity and greatly impacting profitability.

- Improve Accuracy
- Increase Productivity
- Integrated Management
- Better Item Visibility
- Simplified Process
