

OPERATIONAL VISIBILITY

RAPID. CLEAR. RESPONSIVE.

Rapid. Clear. Responsive.

You need to be able to quickly and easily run reports that shed light on the status of your operation. Existing reporting tools can be hard to use and are often inaccurate. Ascension Logistics's Operational Visibility (Ops Viz) application gives you complete operational clarity at the push of a button.

Keep your operation moving forward with OpsViz by quickly generating relevant reports with little effort.

- Simple answers to complex problems
- Augment visibility quickly by adding pre-packaged or custom reports

OPS VIZ FROM ASCENSION LOGISTICS

- Reduces operator wait times, increasing overall productivity
- Simple interface of question and answer
- Easy to use, comprehensive results
- Reduce impact on the system, minimizing system overload
- Increases accuracy

DELIVERING INFORMATION CLEARLY.

Imagine having the ability to run a simple query that would deliver clear, accurate results without overloading the system or requiring multiple reports. You need a clear, consistent view into your operations, and Ascension Logistics Ops Viz application allows for simple, straightforward reports that give you the information you need quickly and accurately, every time.
