

DYNAMIC RF-DDA ACCELERATED DEVELOPMENT

Simple. Easy. Dynamic.

Ascension Logistics understands how valuable time and resources are to your operations. With our DDA Framework for RF Screens, we give you both.

Advanced RF Coding used to be a luxury for the elite. But now Ascension's RF-DDA Framework delivers accelerated RF functionality to the masses. No coding. No complexities. Just simple, easy results.

- Empower the Operations
- Open doors for enhanced visibility
- Lower cost of ownership
- Put business users into the driver's seat
- Rapid ROI due to low cost of development
- Potential cost and time savings up to 80%

RF-DDA FROM ASCENSION LOGISTICS

- RF-DDA allows users to:
 - Query
 - List Results
 - Perform Actions
 - Navigate Information
- Source code not required for development
- DDA can flow and interact with existing RF forms
- Rapid development and minimal risk

SPEED. VISIBILITY. EMPOWERMENT.

Your business relies on adapting to change at the push of a button, but often times it takes weeks of coding and costly development to get changes done and installed. Not anymore. Ascension Logistics proudly provides and RF-DDA solution that eliminates the need for code development and allows for fast easy deployment.

- Significantly reduce time and cost of implementation
- Enhance visibility and productivity
- Enable business users to deploy
