WMS TECHNOLOGY CONSULTANTS

Ascension Logistics is a supply chain consultancy known for building lasting partnerships with customers to design, develop and deploy supply chain systems and processes to optimize throughput, reduce logistics costs and increase supply chain responsiveness.

Our customers harvest previously stranded margin and use it to fuel growth engines. Operations become value-creating machines that are sustained with increasing customer satisfaction and predictable outcomes.

Our experience with industry leading consumer packaged goods, manufacturing, electronics, distribution and 3PL firms has proven that peak business performance is achieved through an optimized supply chain.
